HOSPITALIZATION POLICY

In order to provide the best veterinary care and a healthy environment for your pet during its stay at Evergreen Animal Hospital, the following policies have been set forth:

- 1. Each animal must be current on all vaccinations.** Unless proof of vaccinations is available, the necessary vaccinations will be given at the owner's expense. This is probably the most important part of protecting the health of your own pet(s) and others in the hospital.
 - a. Dogs require **Rabies and DHPCP** (distemper, hepatitis, parainfluenza, coronavirus, parvovirus), and **Bordetella**.
 - b. Cats require **Rabies, and FVRCP**, (feline viral rhinotracheitis, calici, panleukopenia, and chlamydia).
- 2. Any pet who has not been tested for intestinal parasites in the last year will be tested and dewormed at the owner's expense.**
- 3. Any pet found to be infested with fleas will be treated at the owner's expense.** This may involve a flea bath and/or an oral/topical flea treatment depending on the severity of the problem. This will help us to maintain a flea-free boarding environment for all pets.
- 4. In the event of a medical problem arising during your pet(s) stay, we will try to contact the owner or the person(s) listed below. If the owner or responsible person cannot be reached, Evergreen Animal Hospital will treat the animal at the owner's expense.**

Phone number of person(s) responsible if contact is necessary:

Name: _____ Phone number: _____

Name: _____ Phone number: _____

PAIN MANAGEMENT

A single 24 hour Pain Relief injection is included in any Dental or Surgical procedure.

PAIN RELIEF PACK- This is a take home oral supply for 3-7 pain-free days. Once-a-day non-steroidal anti-inflammatory medications such as **Metacam** (honey flavored liquid), **Deramaxx** (chewable tablet), or **Tramadol** (small tablet or liquid) may be used.

I would like to have the **pain relief pack** for my pet (if Doctor recommended). **YES** _____ **NO** _____

Cost - \$10.50-\$26.50

COMPANION THERAPY LASER- This is the latest non-invasive drug-free technology to help alleviate pain and speed healing. The precise application of light (class IV laser energy) is used to stimulate healing by increasing circulation and decreasing inflammation. This results in fast wound healing, infection control, resolution of swelling, and pain management.

I would like to have the **Therapy Laser** performed on my pet. **YES** _____ **NO** _____

Cost - \$20.00

I acknowledge that no assurance or guaranty has been made of the results of surgery or treatment, and that risks and possibilities of complications exist in any surgical or medical treatment. I also understand that I assume financial responsibility for all services rendered, and that payment is due on release from the hospital. Remember, we are here to serve the best interest of your pet, therefore, any comments you have on improving this service are welcomed.

I have read and understand this authorization and consent.

Thank you, The Staff at Evergreen Animal Hospital
